Re Northern Pass Docket 2016-03

The people do NOT want transmission lines buried through the middle of their towns. There are burial alternatives.

Home Rule does not stop at the state level. “Town Rights” are as important as “States Rights.” I expect consistency in adhering to this principle from our Governor, State Legislators and the SEC.

The principle of self-determination that you strongly advocate are what got you elected and appointed. **Are you listening?**
