I'm very grateful to the town of Fitzwilliam for working with NextEra to host this project.

We have to get our energy from somewhere and this is one of the very cleanest sources of renewable energy.

Even though CT will be paying for the project and getting Renewable Energy Credits, it is still all one grid and our local source of electricity will be cleaner because of that.

It is so much better than gas, coal or biomass plants.

I hope NextEra will be very respectful of Fitzwilliam's beautiful lands and biological diversity and will compensate the town generously for hosting the project.
