Dear SEC Chairman Goldner and Committee Members,

My brief comments regarding the Subcommittee's recommendation to the Site Evaluation Committee regarding Charge 1 are as follows -

Noise averaging over a one hour time frame for Antrim Wind does not meet the SEC rule.

The SEC rule does not contain language that supports one hour averaging.

In reviewing other industrial wind projects in New Hampshire, the SEC has never used the standard of noise averaging.

The Subcommittee has no authority to make rules.

Antrim Wind already has a certificate to operate. The SEC cannot change the rules under which the certificate was issued.

Is Antrim Wind really for the public good when the facility exceeds the noise threshold and harms the well being of its neighbors?

Nancy Watson
