PROCEEDINGS

CHAIRWOMAN MARTIN: Good afternoon, everyone. We're here today for a public meeting of the Site Evaluation Committee.

The meeting is being held by remote access due to COVID-19 concerns. We do have a hard stop today at 4:30, so we will need to stay on track. I have to read the DOJ guidelines because this is a remote meeting.

As Chairwoman of the Site

Evaluation Committee, I find that due to the

State of Emergency declared by the Governor

as a result of the COVID-19 pandemic, and in

accordance with the Governor's Emergency

Order No. 12, pursuant to Executive Order

2020-04, this public body is authorized to

meet electronically. Please note that there

is no physical location to observe and listen

contemporaneously to this meeting which was

authorized pursuant to the Governor's order.

However, in accordance with the emergency

order, I am confirming that we are utilizing

Webex for this electronic meeting. All

members of the Committee have the ability to

communicate contemporaneously during this meeting, and the public has access to contemporaneously listen and, if necessary, participate. We previously gave notice to the public of the necessary information for accessing the meeting in the Order of Notice. If anybody has a problem, please call (603) 271-2431. In the event the public is unable to access the meeting, the meeting will be adjourned and rescheduled.

Okay. We have to take a roll call attendance of the Committee. When each Committee member introduces themself, please also state whether anyone is present in the room with you; and if so, please identify them. Let's start with Commissioner Scott.

COMMISSIONER SCOTT: Helps to unmute. My name is Bob Scott. I'm Commissioner of the Department of Environmental Services. I'm vice-chair of the Site Evaluation Committee, and I am alone in my home library.

CHAIRWOMAN MARTIN: Okay. Thank you.

1	Commissioner Sheehan.
2	COMMISSIONER SHEEHAN: Good
3	afternoon. Victoria Sheehan, Commissioner
4	for the Department of Transportation, and I
5	am alone at home in Nashua.
6	CHAIRWOMAN MARTIN: Thank you.
7	Mr. York.
8	MR. YORK: I'm Michael York,
9	representing the Department of Natural and
10	Cultural Resources. I'm alone in my office
11	at 20 Park Street in Concord.
12	CHAIRWOMAN MARTIN: Okay. Ms.
13	Duprey.
14	MS. DUPREY: Hi, I'm Susan Duprey,
15	public member. I'm at my home in Concord,
16	New Hampshire, in my home office. I have two
17	sons in the house milling around, but they're
18	not in my office.
19	CHAIRWOMAN MARTIN: Okay. Thank
20	you.
21	And Mr. Arvelo. You're on mute.
22	MR. ARVELO: There we go. Will
23	Arvelo, Director of the Division of Economic
24	Development, representing business and

1	economic affairs. I am home in my office
2	alone.
3	CHAIRWOMAN MARTIN: Thank you.
4	And Mr. Kassas.
5	MR. KASSAS: Good afternoon.
6	George Kassas. I'm in my home office in
7	Salem, New Hampshire. And I'm a full member
8	of the SEC Committee.
9	CHAIRWOMAN MARTIN: Okay. Thank
10	you.
11	And I am Dianne Martin. I am
12	Chairwoman of the Site Evaluation Committee,
13	and I am also alone.
14	Okay. Let's move on to the agenda.
15	Agenda Item 1 is the review and discussion
16	regarding the Antrim Wind post-certificate
17	filings. First we will take up Item A,
18	request by TransAlta for waiver of New
19	Hampshire Admin. Rule Site 301.18(e)(5). And
20	I'm going to ask our counsel, Attorney
21	Iacopino, to give an overview and background.
22	Attorney Iacopino.
23	MR. IACOPINO: Thank you, Madam
24	Chair. Just to lay this out for the

Committee, our rule, Site 301.18(e)(7), requires that a wind energy facility that is granted a certificate must conduct post-construction sound monitoring surveys, the first one within three months of commercial operation, and then one in each season thereafter. And that is a requirement of the Antrim Wind Project. It is also referenced on Page 10 of Antrim Wind's Certificate to Operate.

Antrim Wind, through its parent company, TransAlta, did file a report for the Winter 2020 Sound Survey. They thereafter filed a request with this Committee to waive Rule 301.18(e)(7) in the following way:
They've asked, first, that the Committee defer a Spring 2020 Survey, sound survey, and report to the spring of 2021. They give two reasons for asking for that. The first is that one of the property owners where the sound survey locations would require there to be samples taken has denied them access to her property.

The second reason is that Turbine

No. 3 in the turbine array was offline from May through June of this year; so that includes some of the spring season. And I assume that's because they want to get an accurate sound survey, and they could not do that if all nine turbines were not operating.

They report that they believe they will get better data if the spring survey is deferred to 2021. And they may also -- they report they may also be able to negotiate with the landowner at Location No. 4 to obtain her consent.

In addition to that request, the request also asked the Committee to waive the requirement that the post-construction sound survey be taken -- in other words, that sound samples be taken from the same exact locations where they were for the pre-construction survey. Specifically, they asked that you waive the requirement that they conduct -- that they sample data from Location 4. Their reason for that is that is the location of the homeowner who has denied them access to her property.

So it's a twofold request. One is to -- the first part of it is to defer the spring study, and the second is to allow them to do their future studies without Location No. 4 if they cannot get the consent of the landowner to go on the property.

Those are the requests that are contained within the waiver request. So I guess that's -- what the Committee must do is you must determine whether or not you wish to grant the waiver. In order to grant a waiver, there is a requirement in our rules, if I can get to it, just a second, that reads as follows: "In order to grant a request for a waiver, you must find that the waiver serves the public interest," No. 1; and No. 2, "that the waiver will not disrupt the orderly and efficient resolution of any matters before the Committee or the Subcommittee."

The rule goes on to instruct you that in determining the public interest, the Committee or Subcommittee "shall waive a rule if compliance with the rule would be onerous

or inapplicable, given the circumstances of 1 the affected person" -- in this case, that's 2 the TransAlta/Antrim Wind company -- "or the 3 purpose of the rule would be satisfied by an 4 alternative method proposed." 5 So that's the standard that applies 6 7 to waiver requests. I am happy -- I think 8 that lays out sort of what the request is, what the factual allegations are, and what 9 the standard for your review is. 10 11 CHAIRWOMAN MARTIN: Ms. Duprey. MR. IACOPINO: Should I -- I see 12 Ms. Duprey has raised her hand. Do you want 13 14 me to take the questions, Chairwoman Martin? 15 CHAIRWOMAN MARTIN: Is it a 16 question for Attorney Iacopino? 17 MS. DUPREY: It is. 18 CHAIRWOMAN MARTIN: Go right ahead. 19 MS. DUPREY: I'm sorry. I wasn't 20 paying attention to the second part of what 21 it was that we have to find. Could you say 22 that again? 23 MR. IACOPINO: The second --Sure. 24 I'll go over the whole thing.

1	You must find in order to grant
2	a waiver, you must find that the waiver
3	serves the public interest and that the
4	waiver will not disrupt the orderly and
5	efficient resolution of matters before the
6	Committee or Subcommittee. And then there's
7	a definition of "public interest" within the
8	rule which says that, "in determining the
9	public interest, the Committee or
10	Subcommittee shall waive a rule if compliance
11	with the rule would be onerous or
12	inapplicable given the circumstance of the
13	affected person" and in this case, the
14	affected person is Antrim Wind "or the
15	purpose of the rule would be satisfied by an
16	alternative method proposed."
17	CHAIRWOMAN MARTIN: Attorney
18	Iacopino, what's the standard
19	(connectivity issue)
20	[Court Reporter interrupts.]
21	CHAIRWOMAN MARTIN: What's the
22	standard on the deferral, if any?
23	MR. IACOPINO: It is the same
24	standard. They are the deferral is the

first part of the request for a waiver of the rule. The rule requires that the sound studies be conducted, one in each season; so one within three months after commercial operation, and then one in each of the next three seasons. They are seeking to waiver from that rule to defer what would be the Spring 2020 study, to defer that to Spring of 2021.

I would point out that the rule that requires the studies does allow the Committee also to change the timing if it deems it appropriate. Let me get to the correct rule here.

(Pause)

site 301.18(e)(7)(b) allows
adjustments to the schedule, subject to
review by the Committee or the Administrator.

CHAIRWOMAN MARTIN: Okay. Thank you.

Mr. Arvelo.

MR. ARVELO: So far, just see if I understand timelines. So we've had a study done in winter of 2020, summer and fall 2020?

MR. IACOPINO: The summer study
is -- my understanding is that they're in the
process of putting the data together from the
summer study, and they will -- I assume that

samples for the fall.

MR. ARVELO: Okay.

MR. IACOPINO: And I only know that from the various e-mails that have gone back and forth. So the developer is in the process of addressing both of the upcoming studies.

they will be proceeding to take their sound

CHAIRWOMAN MARTIN: Ms. Duprey.

MS. DUPREY: I'm just curious if
the rules require that these studies, these
seasonal studies, be done during certain
months. It's striking me that it's pretty
late to be called "fall" now. And I assume
that they're season-specific for a reason;
otherwise, they would have said "four times a
year."

MR. IACOPINO: I believe they are season-specific for a reason, particularly with respect to wind energy facilities,

1	because the weather can make a difference in
2	the level of the sound, as does things like
3	insects and foliage and whatnot. So, yes,
4	they are. But I don't I guess I don't
5	want to be misunderstood. I don't have all
6	of the details of the developer's status.
7	But I understand that they've been taking
8	measurements without going to Location 4.
9	It's just not yet been synthesized yet into a
10	report.
11	If you note, the Acentech report
12	that they filed from their first study was
13	fairly lengthy. And I assume it takes a bit
14	to put take the data and put it
15	together
16	MS. DUPREY: Okay. Thank you.
17	MR. IACOPINO: into the report.
18	CHAIRWOMAN MARTIN: Commissioner
19	Scott.
20	COMMISSIONER SCOTT: Yes. So Madam
21	Chair, I had my virtual hand raised. Is that
22	working for me?
23	CHAIRWOMAN MARTIN: I do not see
24	virtual hands. Real hands are better.

COMMISSIONER SCOTT: Okay, then

2 I'll do it that way.

Thank you, Madam Chair. Couple things. For the record, obviously, the TransAlta waiver request cites 302.15 for the waiver; it's 05, obviously.

But my real question was, if

Attorney Iacopino knows, it's hard to tell

from reading the materials, did they take

some data samples in spring of 2020? It

sounds like it.

MR. IACOPINO: I'm not sure. I agree with you that it does sound as though they did take some. I think that they have two concerns about spring of 2020, and that is one of the turbines was down for a good part of the year -- or a good part of the season, and the other was the access. So I don't know if they went up and tried to take samples from the remaining locations.

And Mr. Scott, I also don't know, right off the top of my head, the orientation of those locations to the turbine that was down.

COMMISSIONER SCOTT: Okay. Thank you. So that's -- I'm getting an echo on myself. Don't know if everybody is on mute.

So that would apply to some spring measurements for 2020 available on L2 and L5, I believe, since L4 is not available and L3 had issues. So what I'm asking, I guess, is they don't seem to indicate how they would, if at all, incorporate that data if we allowed them to defer or waive. Is that your understanding, too?

MR. IACOPINO: I read the request to defer the entire study -- in other words, not to provide one for the spring of 2020 but to defer it to 2021. And they hope that maybe the landowner will allow them back to Location 4, and also, obviously, they're hopeful that all their turbines will be up and running.

COMMISSIONER SCOTT: And finally,
to the extent we have a request for waiver
for the location, as you just said, and it's
in their letter, should the property owner
have a change of heart and allow that

monitoring, you know, then I read it as they would, even if we granted a waiver, it would be conditioned upon the property owner still not allowing them in.

MR. IACOPINO: Yes, I think that is correct. And if that is the inclination of the Committee, we can certainly put that in an order or a directive.

CHAIRWOMAN MARTIN: Mr. Kassas.

MR. KASSAS: Thank you, Madam Chair.

Michael, two or three quick question here. Are there any technical reason for the deferral to Spring 2021?

That's one.

Two, what would be -- if the deferral is -- or if the waiver is granted, what would the duration be for that waiver?

Does it expire at a certain time?

And the third one. What if they do not get any permission from the landowner to conduct the study that they're hoping to conduct? What would happen? Would that be deemed insufficient completion? Or what

would the scenario look like?

2 CHAIRWOMAN MARTIN: You're on mute.

MR. KASSAS: I am. I went on mute.

MR. IACOPINO: I was on mute.

Sorry.

I'm going to answer No. 3 first.

Part of the rule that they're requesting us to waive is so that they don't have to go back to Location No. 4, L4, if the landowner will not let them. So they're asking for that waiver across the board. And what Mr. Scott just referenced was that if the landowner does let them, at least Mr. Scott believes that we probably should require them to do that location because you would get a more complete sound study.

To answer your first question, the technical reason that they put forth for not having done the 2020 spring study and wishing to defer it to 2021 is because Turbine 3, which is in some proximity, that I don't know the exact distance, to the various locations, Locations 1 through 5, was not operating because of a malfunction of some sort from

May through June of this year. And so the technical reason is that you would not get the full idea of what the noise actually is when the facility is operating at 100 percent. And I forgot your second question. I'm sorry.

MR. KASSAS: The duration for the waiver. Is there like -- does it start and expire at a certain time, or is it just indefinite or what?

MR. IACOPINO: Well, no. waiver, what would it do -- I mean, the waiver, as it is requested, they still intend to provide three studies. They're just deferring the spring one to next year, to 2021. They still intend to present a fall study and a winter study. That's all that is required under the rule. So, really, they're just extending it to the spring study of 2021. And there would not be an expiration of the waiver. The terms of the rule would apply for those individual studies. They'd still have to do the same type of study, obviously without Location 4, if that's your

decision.

2 MR. KASSAS: Okay. Thank you.

3 CHAIRWOMAN MARTIN: I think Ms.

Duprey had her hand up next, and then I'll go to you, Commissioner.

MS. DUPREY: Attorney Iacopino, who else is affected by this Location 4? In other words, is the information gathered from Location 4 pertinent only to the homeowner that's refusing to let us on the property, or does it affect other homeowners as well?

MR. IACOPINO: I think the answer is that it does affect that homeowner. It may affect other homeowners. I can't say for sure on that. But I think the one thing that it does affect is, the way our rule is written, is we have a pre-construction study and then we have the post-construction studies. And what the rule is trying to do is replicate that pre-construction study after the facility goes into commercial operation to see if in fact it performs as was advertised, if you will, in the Application. And it also obviously gives a

built-in measure for the Committee, over the course of a full year, as to whether or not this facility is complying with our rule that prohibits sound-pressure levels in excess of 45 dBA, or 5 above background at nighttime -- during the daytime and 40 dBA at nighttime.

So it's really twofold: Without Location No. 4. You're not going to get an exact replication of the pre-construction study --

MS. DUPREY: In that area.

MR. IACOPINO: -- and that's the biggest concern. Right.

MS. DUPREY: So while I realize that it wouldn't connect back to the preapproval study, I don't understand why another location isn't being offered in the event that this one can't be negotiated, because if it's affecting other homeowners, it seems to me that the second part of the reason for doing this is still applicable and is the major reason, in my view. And it just seems deficient to me to not be suggesting another location if other homeowners are affected by this failure to gaining approval

for Location 4.

MR. IACOPINO: I'm unaware of them having suggested an alternate location for L4, Ms. Duprey.

MS. DUPREY: Okay.

COMMISSIONER SCOTT: Thank you.

And for that last discussion, obviously, that
in itself would have required a waiver also
since it's not consistent with the original
monitoring location.

so having said that -- and again I was talking earlier about any data that was collected for spring of 2020 -- looking at 302.05, I do find that this does seem to meet that requirement, that it would be onerous or inapplicable. This is clearly for L4, Location 4. This is clearly beyond the control of the project if the landowner doesn't want to -- you know, changed their mind and doesn't want to participate anymore. It's really outside their control. So I do find that to be the case.

To the extent we grant a waiver, which I think I am suggesting that we do, I

would make it, again, conditional that, as we just discussed, that if the landowner changes their mind, that they would proceed with L4 in the spring of 2021. And I'd also like to see whatever data was collected in the spring of 2020 presented when the 2021 data is presented also, understanding that it may be imperfect. Certainly the Applicant can put whatever caveats and analysis on that. But I would like to have that data in the public record also as part of that. So that's my feeling. I don't know if we're ready for motions yet, Madam Chair.

CHAIRWOMAN MARTIN: The rule requires, before we make a decision, that we hear from other parties. So I think at this point we should open it up for TransAlta and/or any other party who would like to be heard.

Mr. Wind, do you know if we have anyone who's indicated they want to speak?

MR. WIND: No indications at this point. But we can give someone a minute to

So,

send me a message via the Q&A function.

1	send a message via Q&A to the PUC Web
2	Moderator.
3	CHAIRWOMAN MARTIN: Okay. Thank
4	you. Just pause for a moment.
5	(Pause in proceedings)
6	MR. WIND: So Mr. Getz has stated
7	he is available, so I think we can interpret
8	that as a request to speak.
9	So Mr. Getz, you are unmuted. You
LO	may speak.
L1	MR. GETZ: Thank you. Good
L2	afternoon, Madam Chair. To the extent you
L3	can see me, I apologize for not having
L 4	thought through in advance enough to put on a
L5	coat and tie.
L6	To respond to some of the issues
L7	raised in the discussion, Antrim did not
L8	propose an alternate location for
L9	L4 because
20	CHAIRWOMAN MARTIN: Attorney Getz,
21	can I just ask you to state for the record
22	who you represent?
23	MR. GETZ: Yes, Madam Chair. This
24	is Tom Getz from the law firm of McLane

Middleton, and I am representing Antrim Wind in this proceeding.

CHAIRWOMAN MARTIN: Thank you. Go ahead.

MR. GETZ: Just to address the issue of why Antrim Wind did not propose an alternate location, it's because there would I think Mr. be nothing to compare it to. Iacopino covered the issue of the purpose of what pre- and post-construction reports are is to make the judgment of whether, you know, actual measurements were consistent with the estimates or predicted measurements. would be really difficult to come up with an alternate location that would meet the purposes of that. So that's why Antrim Wind proposed to, first, postpone the Spring 2020 report to spring of 2021; and then also, for the summer and fall measurements, to do the reports based on those measurements, based on the four locations that were available to it. And it conducted the summer measurements, and it's in the process right now of conducting the fall measurements. But it takes some

1 time to compile the full reports, or the "surveys" as they're referred to under the 2 rules, until you've collected all the data. 3 But that's basically the three things that's 4 covered under this request to adjust the 5 schedule and to waive the rule. But I'd be 6 7 happy to answer any other process-related questions or technical issues, to the extent 8 I can. And Mr. Latour from the Company is 9 10 also available if there are any particular 11 technical questions. CHAIRWOMAN MARTIN: 12 Attorney Iacopino, I saw your hand up first. 13 14 MR. IACOPINO: No, I'll give way to 15 Ms. Duprey. That's fine. 16 CHAIRWOMAN MARTIN: I think Mr. 17 Arvelo was actually before Ms. Duprey. apologize, Ms. Duprey. 18 Mr. Arvelo. 19 20 MR. ARVELO: Just trying to 21 understand the sequence of the testing. 22 if L4 did not give permission for spring 23 testing, what happened in the summer and the

I'm assuming that L4 also didn't give

24

fall?

permission for testing in the summer and fall. Is that correct or --

MR. GETZ: That's correct. The summer data includes four of the five locations. The fall data will include four of the five locations.

MR. ARVELO: So that leads me to the follow-up question, that if you're seeking a waiver -- part of the waiver is to do a future study without L4. In a sense, you're already doing that. You've gone ahead and done the studies for summer and fall without L4. So I don't get what the waiver then is for if you're already doing that.

MR. GETZ: So the distinction is between doing the measurements which the Company has done in each of the seasons and filing the report based on the measurements. So, for the spring, Antrim did the measurements, but there were two problems: The one Turbine No. 3 that wasn't operating and the lack of access to Location No. 4. So Antrim was proposing, let's just defer the report for that until next year. But they're

continuing to do the measurements as anticipated. And they're asking that, for summer and fall, that they can do the report with just the four locations, and then that would be deemed to satisfy the rule.

CHAIRWOMAN MARTIN: Ms. Duprey.

Unless Attorney Iacopino, did you need to go
in between?

MR. IACOPINO: I just had a further answer to Mr. Arvelo's question.

I think the whole Committee should know that the request for this waiver was actually filed on July 24th, 2020, just so you're aware of the timing. It's not -- I wouldn't want the Committee to misperceive that they just went ahead. They did ask -- they did file the request; albeit, there had not been a response from the Committee to them because we had to have this hearing.

CHAIRWOMAN MARTIN: And I'll add to that. For those who were present on I believe the July 29th public meeting, the question of whether to address this did come up, and we ended up deciding it was most

appropriate to hold off because of it not being included in the agenda.

Okay, Ms. Duprey.

MS. DUPREY: Thank you. This is directed to Attorney Getz, if this is permissible, and his clients.

I'm wanting to know if other homeowners are affected by Location 4. And while I realize that there's no comparative data to pre- and post, this is to determine the level of sound, regardless of what it was sold as. We know what the State's requirements are, and we can measure the sound out there. It still seems to me that that's a valuable piece of information to have. And I'd like to understand further why we're not replacing "4" with another location and why that couldn't be part of a motion that we make.

MR. GETZ: Well, thank you. I can I think address it this way, and I may not have all of the information for this, but I think it's most useful not to think in terms of particular landowners. But the five

locations are chosen to, as best as possible, represent the, you know, the whole perimeter or area where sound could be measured. these five locations were agreed to. then, when you have now one location where we're not allowed to go, so you don't -- you know, you may not have as much coverage. There may be a way that the Company could describe for you what the lack of -- you know, how that affects the actual coverage of the whole area when you only have four out of But if you're going to pick another location, then you're not going to be able to make that judgment of, in that area, is it better or worse, does it conform to what was predicted in the first instance?

24

So what you'll be able to tell is, of the four locations that you could measure, how does that match up to the four that were measured pre-construction. Now, I understand in the first report, you know, the original winter report, all five locations were there. You may be able to extrapolate from that. But it's just that adding another fourth

location at a different place, it doesn't -you know, it doesn't put you in a position to
make a judgment about the original estimates.

[Court Reporter interrupts.]

CHAIRWOMAN MARTIN: Ms. Duprey, just continue until you're satisfied.

MS. DUPREY: Thank you.

So, Attorney Getz, thank you for that. But are you saying that each of these locations independently of the perimeter don't have value, in terms of letting us know who's affected by the sound of the wind towers?

MR. GETZ: I think they have value in telling you what, you know, what the readings were during the times of the measurements. But it doesn't have the value of comparing pre- and post-construction surveys.

MS. DUPREY: I do understand that.

And I guess what I don't understand is why,
just because you can't get the pre- and post,
there isn't still value to knowing what the
actual sound levels are today.

MR. GETZ: Well, I mean, they are doing that for the four locations. And you could pick other locations and require them to make some measurements. That's some of what's going on with the sound complaints. But, you know, it doesn't address the purpose of the original rule. And that's why the inclination was to ask, you know, to defer spring, and hopefully we'll see where we are next spring in terms of will we get access or Still an open question, but... the not. surveys are already done, the measurement's taken for the summer and fall.

MS. DUPREY: Right. I'm not looking to have the Company go back, and obviously you couldn't do that. I thought I understood Attorney Iacopino to say that there were two parts to the rule. One was the pre- and post, but the other is current readings. Is that not so?

MR. GETZ: Well, I guess I would have to let Mr. Iacopino address that. But the rule, as I understand it, this particular section under post-construction monitoring,

was to use the areas that were -- where pre-construction was done.

MR. IACOPINO: Yes, there are two rules, Ms. Duprey. One is on the method to -- that's 301.18(b)(7), which governs the method by which the post-construction sound studies must be accomplished. And the other is just a rule, a standard across the board, that no wind energy facility will operate at nighttime in excess of 40 dBA, or 5 dBA above the established background noise. And then there's a daytime measure as well. Those are two different things. We have had complaints. And another item on your agenda today is -- revolves around a complaint where the Administrator hired an expert to go out and take sound measurements that were different in nature than the sound study.

MS. DUPREY: Right. So then you're saying that there isn't a rule that values the study just independently for today's sound values, that its only import is with reference back to pre-construction?

MR. IACOPINO: No, I don't think

I'm saying that at all. There is an across-the-board limit on the amount of sound that can be generated from a wind turbine facility, but that exists any given day, regardless of whether the sound studies, the post-construction sound studies have been done or not. In other words, if Antrim Wind right now is operating those turbines and they're in excess of 45 dBA or 5 dBA above background, an enforcement action could occur and actually could be taken by --

MS. DUPREY: Irrespective --

MR. IACOPINO: -- irrespective of the sound studies.

MS. DUPREY: I get it. Okay. So what you're saying is you're not permitted to go above that sound. It's their issue whether they want to have it measured in an area to be able to respond to people -- Acentech's issue -- and that it's not necessary to have another location for that purpose.

MR. IACOPINO: Well, it's up to you all to decide whether it's necessary to have

1 another location. That's a substantive decision that you all can make. I'm just 2 pointing out that there are two levels of 3 rule here: One which is an absolute limit, 4 and the other is a rule that governs how the 5 post-construction sound study should be 6 7 accomplished. 8 MS. DUPREY: Okay. Thank you. CHAIRWOMAN MARTIN: Can I follow up 9 on Ms. Duprey's question, Attorney Getz? 10 11 Do you know if Antrim Wind inquired of any neighbors? Are there neighbors nearby 12 to this property, to see if they would be 13 willing to have the testing done there? 14 MR. GETZ: I don't know the answer 15 16 to that, Madam Chair. I can check. 17 CHAIRWOMAN MARTIN: Does your -does the person with you know? 18 He should. Well, he's 19 MR. GETZ: not with me. But I think if Eric could let 20 21 him in, if you would like, he could probably 22 answer that question. 23 MR. WIND: So I have unmuted Mr.

So if you want to identify yourself

24

Latour.

1 for the record. 2 MR. LATOUR: All right. My name --3 can you hear me? MR. WIND: Yes. 4 5 MR. LATOUR: Awesome. Thank you. My name is Jean-Francois Latour. 6 7 You can call me "Jeff." I'm a employee with 8 TransAlta, and my role is environmental advisor for the Antrim Wind Project. Do you 9 10 want me to answer the question? 11 CHAIRWOMAN MARTIN: Did you hear the question, Mr. Latour? 12 13 MR. LATOUR: Yes, I did. 14 CHAIRWOMAN MARTIN: Okay. 15 MR. LATOUR: There has been 16 different communication between former Administrator Pam Monroe and few landowners 17 that live nearby L4. And we haven't 18 19 necessarily offer doing measurement at those 20 location because there was contemplation of 21 complaint validation measurements, which 22 you'll review during your -- during this 23 Committee meeting, I think at your second or 24 third item on the agenda. So the duplication

1 of having measurement didn't seem to be quite interesting in the spirit of comparing 2 pre-project and post-project sound levels. 3 CHAIRWOMAN MARTIN: Okay. Thank 4 5 you. Does anyone else have questions for 6 7 Attorney Getz or Mr. Latour? MR. IACOPINO: I just was going to 8 follow up on Mr. Scott's question about data 9 from the spring campaign. 10 11 Was there a spring campaign this year; and if so, was there any data 12 collected? That was one of the questions 13 that Mr. Scott had. 14 15 MR. LATOUR: Do you want me to 16 answer this question? 17 MR. IACOPINO: Yes. MR. LATOUR: So there has been data 18 19 collected for the spring measurement. 20 dates, let me just check, between May 27 and 21 June 20. The Turbine 3, not to confuse with 22 Location 3, the Turbine 3 was offline because 23 of a maintenance that was ongoing, and we

needed to keep this turbine offline for a

24

long period of time during -- between May 27 and 18.

So the data was collected.

However, the data was -- due to the fact that the Turbine 3 was not in operation, the data collected is not under conditions expected to results in the greatest turbine-related sound at each location. And this is the reason why we believe that it is in the public interest that we defer this exercise to Spring 2021, where we believe, or when we believe that we will be able to satisfy all those prescription of greatest turbine-related sounds condition.

CHAIRWOMAN MARTIN: Sorry. I was looking for my unmute. I think Mr. Arvelo had his hand up before.

Mr. Arvelo, do you still have a question?

MR. ARVELO: Madam Chair, yes, and it's related to your question and comments as it relates back to Ms. Duprey's concern.

The L4, is that a designation of an area on the map, or is that a designation of

a specific residential property? And to me they're different, because if it's an area, it could incorporate additional residences that might fall within L4. So I'm trying to understand that.

MR. LATOUR: The L4 is actually a point location with very precise GPS coordinates that is located at a specific land owned by a landowner that has refused us access in the past. And so it's not an area, it's really a point location.

MR. ARVELO: Thank you.

CHAIRWOMAN MARTIN: Ms. Duprey.

MS. DUPREY: I'd like to follow up on Mr. Arvelo's question.

I do realize that it's a specific location that you're testing from. But is the test of that area -- of that point not applicable to a geographic area? I mean, it would seem to me that it has to be.

MR. LATOUR: The difficulty with the pre- and post-project comparison is, and especially in this area, is that the background sound, the sound that comes from

the environment itself, could be important depending on the time of the day and the wind speeds, especially, and as you'll see later on your second item of the agenda, the noise generated by the foliage when the trees and the leaves moves following the wind could be important. So a measurement done at an alternate location where we haven't had the opportunity to do a pre-project measurement doesn't give us much to compare with.

MS. DUPREY: I see.

MR. LATOUR: If there is a concern that we're -- that the levels may step over the line, there's always the complaint validation process where we can assess with the absolute limit of 40 dBA. But for the purpose of performing not only attendant measurement as it is done for complaint validation, but also unattended measurement, it's hard when you don't have the pre-project data to distinguish between the facility-specific noise and what is the contribution of the environment. And that is one of the main reason why we haven't

1	suggested an alternate in this case.
2	MS. DUPREY: Okay. Thank you very
3	much.
4	MR. LATOUR: Pleasure.
5	CHAIRWOMAN MARTIN: I believe we do
6	have Mr. Tocci available as well if those
7	questions if the Committee would like to
8	direct any questions to him.
9	Are you all set, Ms. Duprey, or
10	would you like Mr. Tocci to come on?
11	MS. DUPREY: I think I'm good.
12	CHAIRWOMAN MARTIN: Okay. Thank
13	you. Anybody else?
14	[No verbal response]
15	CHAIRWOMAN MARTIN: All right. Are
16	we ready to entertain a motion?
17	I want to confirm we haven't heard
18	from anyone else, Mr. Wind, that they would
19	like to speak?
20	MR. WIND: Correct.
21	CHAIRWOMAN MARTIN: Okay. Thank
22	you.
23	Do we have a motion? I was going
24	to say I'm looking at you, Commissioner

1 Scott.

24

need to.

2 COMMISSIONER SCOTT: I was just looking for permission to speak. So, yes, 3 I'd like to make a motion that -- twofold: 4 That for the -- that we waive, in accordance 5 with Site 302.05, that we waive the -- we 6 7 grant the waiver for the location, again, 8 conditional upon property owner change of heart for Location 5 -- 4, excuse me -- and 9 we also grant the waiver for the deferral of 10 11 the spring "campaign" -- I like that word -with a caveat that the data that was 12 collected in the 2020 campaign for the spring 13 14 also be included with appropriate caveats, so 15 that way the data can still be made public. 16 CHAIRWOMAN MARTIN: Do we have a 17 second? COMMISSIONER SHEEHAN: 18 Commissioner I'll second. 19 Sheehan. 20 CHAIRWOMAN MARTIN: Okay. Any 21 discussion on the motion? 22 Okay. Oh, Commissioner Scott. 23 COMMISSIONER SCOTT: Maybe I don't

So, again, looking at 302.05,

Waiver of Rules, 302.05(b)(1) talks about if it's in the public interest, the Committee or Subcommittee shall waive a rule if compliance with the rule would be inapplicable given the circumstances. And again, I think that's what we're talking about. I think for the property owner not granting access, that kind of makes it almost impossible for -- well, it is impossible, unless they violate the law and trespass. Similarly with one of the turbines down, they're not able to meet the requirement for, you know, worst case, if you will, for sound, since one of the turbines was down during that earlier session.

CHAIRWOMAN MARTIN: So we would find that it serves the public interest because compliance with the rule would be onerous or inapplicable -- (connectivity issue)

[Court Reporter interrupts.]

CHAIRWOMAN MARTIN: I said so we would find that the waiver is in the public interest because compliance with the rule would be onerous or inapplicable. I see

Commissioner Scott nodding.

COMMISSIONER SCOTT: I agree.

CHAIRWOMAN MARTIN: Okay. And then the second part is the waiver will not disrupt the orderly and efficient resolution of matters before the Committee. Any discussion on that?

Mr. Arvelo.

MR. ARVELO: Just a question. If we approve this, and then in the spring of 2021 they go to do the study and there's a turbine or two or some turbine down, they don't have access to L4, what does that do? Does that kind of move it to the next spring, or does that -- so the question in my mind is what happens if those sort of scenarios happen, where a turbine may be down at that time?

CHAIRWOMAN MARTIN: Attorney

Iacopino, do you want to respond to that?

MR. IACOPINO: Sure. Presumably,

like with respect to any regulation, we would

expect that the regulated entity would make

contact with the Committee, advise of any

difficulty that they're having, and if appropriate, file a request for a further waiver, given whatever the circumstances are at that time if they deemed it necessary. So I think that would be something that would depend upon what the circumstances are on the given day. We always encourage those in the regulated community, however, to communicate with us. Hopefully by spring of 2021 there will be a new administrator in place so that it's easier for our community, our regulated community, to communicate. But that is what I would foresee the process being if that were to occur, Mr. Arvelo.

CHAIRWOMAN MARTIN: Okay. So we have, I think -- Commissioner Scott, did you want to revise your motion to include the findings?

COMMISSIONER SCOTT: I'm not sure I follow the question, Madam Chair.

CHAIRWOMAN MARTIN: In other words, do you want to move that the Committee find that it's in the public interest and that it will not disrupt the orderly and efficient

1	resolution of matters before the Committee?
2	COMMISSIONER SCOTT: Yes,
3	that's what I implied that, but I didn't
4	say it. But yes.
5	CHAIRWOMAN MARTIN: Okay. Attorney
6	Iacopino, do you have a full understanding of
7	the motion? You're on mute.
8	MR. IACOPINO: I believe I do.
9	Thank you.
10	CHAIRWOMAN MARTIN: Okay.
11	Excellent.
12	Commissioner Sheehan, would you
13	like to second the revised motion?
14	COMMISSIONER SHEEHAN: I'm happy to
15	second the revised motion.
16	CHAIRWOMAN MARTIN: Any discussion
17	on the revised motion?
18	[No verbal response]
19	CHAIRWOMAN MARTIN: Okay. Seeing
20	none, let's take a roll call vote, starting
21	with Commissioner Sheehan.
22	COMMISSIONER SHEEHAN: Yes.
23	CHAIRWOMAN MARTIN: Commissioner
24	Scott.

1	COMMISSIONER SCOTT: Yes.
2	CHAIRWOMAN MARTIN: Mr. York.
3	MR. YORK: Yes.
4	CHAIRWOMAN MARTIN: Mr. Arvelo.
5	MR. ARVELO: Yes.
6	CHAIRWOMAN MARTIN: Ms. Duprey.
7	MS. DUPREY: Yes.
8	CHAIRWOMAN MARTIN: And Mr. Kassas.
9	MR. KASSAS: Yes.
10	CHAIRWOMAN MARTIN: Chair votes
11	yes. It's unanimous. The motion carries.
12	Okay. Move on to Item B on the
13	agenda, which the peer review of the Acentech
14	Winter 2020 Sound Monitoring Report authored
15	by Cavanaugh Tocci Associates, dated
16	September 4th, 2020.
17	Again I'll ask Attorney Iacopino to
18	give us some background and overview.
19	MR. IACOPINO: Thank you, Madam
20	Chair. Consistent with the rule governing
21	the post-construction sound-pressure studies,
22	the Applicant or the developer, Antrim
23	Wind, filed on May 12, 2020, the Winter 2020
24	Post-Construction Sound Monitoring Report,

which was done by their contractor, Acentech. That's A-C-E-N-T-E-H-C-H. It was a lengthy report. There were some complaints heard by the Administrator at the time. The Administrator employed Mr. Tocci to do a peer review of that report.

23

24

On September, I believe it's September 2nd, Mr. Tocci filed with the Committee a -- I'm sorry -- September 4th, filed a letter with the Committee, giving the Committee the results of his peer review of the report. And essentially, that peer review found that the report was compiled in accordance with our rules and with the standards set forth in our rules and that it was likely that the entire wind array, wind turbine array, was operating within a range of 32 to 38 dBA. That's not at any particular location, I do not believe, but that's the way that that's written. But in any event, Mr. Tocci found that the report prepared met the standards of our rules and the ANSI standards, A-N-S-I, and he essentially endorsed its contents.

The one recommendation that he did make was that, in the future, that there be a better explanation of the way the data is collected and the manner in which it is reported so that it reads easier for a layperson who may not have an engineering or acoustic background.

There's no -- I mean, what's before the Committee is simply to review that report. You can determine whether you wish to take any action at all. I can tell you that the report is not popular with some of the opponents to the project. And I do understand that Mr. Tocci is available to answer questions.

CHAIRWOMAN MARTIN: Ms. Duprey.

MS. DUPREY: Yes. In reading this report, and, you know, it's fairly technical, I don't really remember it addressing what I sort of considered as the main issue raised by the complainants, that being the interval that the sound was measured in. The people who object to the report say that it's average in increments that are I think by

1	hour as opposed to, I think I thought it
2	should be seconds, as I'm recalling it. And
3	I'd like to understand where the what the
4	average actually was. When I looked at the
5	SEC rule, I saw something about .0125
6	seconds. And so I'm mixed up as to what the
7	standard is and how it got into whatever
8	increment it's in and why that's valid.
9	CHAIRWOMAN MARTIN: Attorney
10	Iacopino, do you have a response to that?
11	And also, I think perhaps we should
12	bring on Mr. Tocci, Mr. Wind, if you could,
13	so he's available for the Committee.
14	MR. IACOPINO: That was going to be
15	my suggestion as well. My answer would be
16	highly untechnical with respect to that, so I
17	would defer that question to Mr. Tocci.
18	MR. WIND: So I've made Mr. Tocci a
19	panelist.
20	So you can turn on your video if
21	you so choose and mute and unmute your own
22	feed.
23	CHAIRWOMAN MARTIN: Welcome, Mr.
24	Tocci. Can you hear me?

MR. TOCCI: Yes, I can, Chairwoman Martin. Thank you for inviting me here today.

I did prepare the report, sent to Pamela Monroe on September 4, reviewing the Acentech report on measurements done in Winter 2020 of Antrim Wind Farm sound. And the way I went about this is that the first part of the report really touches upon the technicalities of how measurements are to be conducted. And just going through the report and comparing it to the Site 301 standard, 301.18 standards, I found that, yes, the procedure that they follow was generally in line with those of 301.18.

The data that was reported -- sorry you can't see me. I haven't got an explanation for that. In any event, the data that was presented, it's pages and pages of sound-pressure levels. And I did not attempt to re-analyze the data that was presented in the report. I think that would have been inappropriate. The purpose of a peer review is to identify that the measurements were

done in accordance with the site standards.

And I reviewed their conclusions, and I see that the logic and the analysis process was correct and that the conclusion they reached was also -- I agreed with that conclusion, being turbine-only sound levels under conditions meeting maximum sound were all below the lowest sound limits for the project. This is found to be the case for all five sound monitoring locations, thereby demonstrating the Project's sound compliance. I had no reason not to accept that, based on their discussion and the way that they -- the description of the computations.

But in order to try to sort of arrive at my own conclusion regarding sound levels, what I did was to use a very small amount of data that they had before and after a turbine shutdown in order to estimate the sound levels at that point in time, that three-hour, four-hour window were. And my conclusion was that they were -- they ranged lower than what Acentech had determined, that the sound levels ranged between, I believe it

was 27 and 38 dBA. And so that my conclusion, independent of theirs, was that, yes, although I had used a very limited amount of data, that I agreed with them, that the sound levels were acceptable.

19

20

21

22

23

24

And now there is a question that has come up regarding the 125 millisecond data. Can you hear me, by the way? Yes?

CHAIRWOMAN MARTIN: Yes, we can.

MR. TOCCI: The 125 millisecond The way sound levels were predicted in data. the environmental impact process was to use the IEC standard for estimating sound power levels produced by wind turbines. That sound power level was used in a computer program CADMA to estimate what the sound-pressure levels would be at nearest residences, and they were found to be acceptable. That was in the Environmental Impact Statement. purpose of measurements was to say, well, look, if that was the process, can that process be verified after the facility is built and fully operating? measurements that were completed, were

completed using the averaging sound level, the equivalent sound level, over I believe it was one hour that they -- or 10 minutes that was used by Acentech. I believe the IEC standard was 10 minutes.

That throws into question, well, what is this 125-millisecond measurement all about? And what it's related to is what is normally called "amplitude modulated sound." This is pulsing sound that sometimes occurs for a couple of reasons by wind turbines. And though it's not loud in itself, it is quite detectable and could be a source of annoyance under certain circumstances.

The process of going from tower
measurements of a wind turbine made by the
manufacturer through the Environmental Impact
Statement process to measurements made
afterwards needs to have a consistent
measurement, a consistent measurement type,
which is an average sound level. That
doesn't take away the fact that you do get
detectable amplitude modulated sound. And I
think there's a bit of a disconnect that the

sound-pressure levels, though they were made in accordance with site standards, Site 301.18 standards, may not have directly looked at amplitude modulated sound. And that's only a guess because that's what the 125-millisecond measurement may have been pointing to. But it was not clear in the standard, in the original Site 301.18 standard, as to how to use that data. It does exist, but it doesn't align with the other descriptors that were used throughout the program.

I don't know if I've answered your questions on that, but I'd be pleased to discuss it with you.

CHAIRWOMAN MARTIN: Ms. Duprey, you're on mute.

MS. DUPREY: Thank you. I don't think you've fully answered it yet.

So you say that .0125, or whatever you call it, that that's not the interval to measure. What is the appropriate interval, and where is that set forth?

MR. TOCCI: I believe it's a

1	10-minute interval. And I believe it's in a
2	standard. But I'm sorry. I can't I
3	should know it, but I can't point it out to
4	you right away. I could dig that out for
5	you
6	MS. DUPREY: Excuse me. Is it an
7	ANSI standard or a site standard, the New
8	Hampshire regulation standard?
9	MR. TOCCI: Yeah, I believe it's
10	ANSI or IEC.
11	MS. DUPREY: Okay. So you're
12	saying that the sound would be measured, or
13	whatever, the measurement would be taken in
14	10-minute intervals. And then I take it, it
15	is averaged out over an hour; is that
16	correct?
17	MR. TOCCI: Yes, I believe so.
18	Yes, I believe so.
19	MS. DUPREY: And just as a point of
20	curiosity, when you look at the 10-minute
21	intervals, are those within the bounds of
22	what the state regulations require?
23	MR. TOCCI: Generally speaking,
24	they were.

1 MS. DUPREY: Well, I don't know when you say "generally speaking" --2 MR. TOCCI: There may be one or two 3 that exceed it sometimes for reasons not 4 related to the wind farm. Could be 5 extraneous noise. 6 7 MS. DUPREY: Okay. And I think I'm 8 correct in summarizing your statement with respect to the interval that is set forth, 9 10 that it was something that was not connected 11 up with the rest of the rules, essentially? Is that what I'm understanding you to say? 12 13 MR. TOCCT: I wasn't sure. not clear to me in the rules how to use the 14 125-millisecond data. 15 16 MS. DUPREY: But you don't -- oh, 17 sorry. MR. TOCCI: Yes, in light of the 18 19 fact that averaging over a much longer period is what normally is done for wind turbine 20 21 sound. 22 What exactly does that MS. DUPREY: 23 rule say? MR. TOCCI: The rule regarding 125 24

1	millisecond?
2	MS. DUPREY: Yeah.
3	MR. TOCCI: Yes. Hold on one
4	second. I'll dig that up. I don't have that
5	section in front of me. I would like to read
6	it directly from the site standard.
7	CHAIRWOMAN MARTIN: Ms. Duprey, I
8	could read it if you'd like.
9	MS. DUPREY: That would be great.
LO	CHAIRWOMAN MARTIN: It says, No. 6,
L1	"All sound measurements during
L2	post-construction monitoring shall be taken
L3	at 0.125-second intervals measuring both fast
L4	response and Leq metrics."
L5	MS. DUPREY: So that just sounds
L6	pretty clear to me that you're supposed to be
L7	measuring in that interval, Mr. Tocci. So
L8	how is it that you feel otherwise? What am I
L9	not understanding?

MR. TOCCI: Right. They are measured in that interval. They just aren't reported. To report 125-millisecond data would require pages and pages of paper. It's hard to use.

1 CHAIRWOMAN MARTIN: Ms. Duprey,

2

3

that was my understanding, was that they were actually taken at .125-second intervals, but they were not really used in that way. It was very -- I think the requirement is clear. I agree with you. But it wasn't clear to me why it would be required to be done that way if it wasn't meant to be used for a purpose that way. Go ahead.

MS. DUPREY: And I raise it because Ms. Linowes represented that she was part of the rulemaking and that they were very specific in wanting this interval. that's I think what's troubling me about this situation, that here this is sitting in the Experts apparently aren't clear on how rule. it's supposed to be used. She was pretty clear on how it was supposed to be used. Acentech is clear on how it wasn't supposed to be used. And here we are trying to sort the whole thing out, and our expert can't really give us an answer. And it's just difficult and troubling.

CHAIRWOMAN MARTIN: Well, I think

to Attorney Iacopino's point, we don't have to take a particular action today. Or our action could be that we'd like to hear comment from Ms. Linowes so we can get an explanation.

23

24

Attorney Iacopino, you had your hand up.

I just wanted to MR. IACOPINO: point out, one factor is that the rule does require that the data be accumulated in the 125-millisecond format; however, Subsection G of the rule governs how it should be reported. And that portion of the rule says, "For each sound measurement period during post-construction monitoring, reports shall include each of the following measurements," and then it says LAeq, LA-10 and LA-90, and LCeq, LC-10 and LC-90. So there is a specific rule on how the data is to be reported out and what average the reports are supposed to include. As I understand -well, I'll leave it at that, because what I understand is really better in Mr. Tocci's ballpark than mine.

MS. DUPREY: So are you saying,
Attorney Iacopino, that those various
standards, which I did read the description
in someone's report, I think it was Mr.
Tocci's report, went through what each of
those measurements in fact are? It didn't
seem to me that that specified an hourly, if
you will, average.

MR. IACOPINO: In the Acentech report, there are a number of tables that report both the A-weighted and C-weighted sound metrics at the various locations. And that's the same measurements -- or the same reporting measurements that I read in the rule, the LA-90, LAeq, LA-10 for the A-weighted, and the LC-90 LCeq, LC-10 for the C-weighted. There are tables for each location reporting out those hourly sound level summaries --

MS. DUPREY: Right, but what's that got to do with the interval?

MR. IACOPINO: Well, my only point is that the rule doesn't require that all of the 125-millisecond data be contained in the

report. That's all. I mean, the data exists is my understanding.

MS. DUPREY: Yeah. But assuming that what you say is so, isn't it also so, that it doesn't say that it should be in an hourly average or a 10-minute average either? I mean, we're kind of at sea here.

MR. IACOPINO: I'm just pointing out what was required to be reported, as compared to the other portion of the rule, as to the manner in which the data was to be reported. That's all.

MS. DUPREY: So as I --

MR. IACOPINO: I'm not trying to take a position one way or another.

MS. DUPREY: I'm just trying to follow the logical conclusion of what you're saying. And it seems to me that what you're saying is that it could be any interval at all because there's none specified.

MR. IACOPINO: No. I think that goes back to the ANSI standard and the IEC standard that are referenced in the rule as well.

1 MS. DUPREY: Okay. Okay. All right. Thank you.

CHAIRWOMAN MARTIN: I think my main concern is I'm still not clear why they required that in the first instance if it was not a meaningful requirement. I think that's what we're trying to get at here.

Ms. Duprey.

MS. DUPREY: I'm just wondering if there's any legislative history. Or I guess would there not be because it's a rule as opposed to a statute?

CHAIRWOMAN MARTIN: Commissioner Scott.

MR. IACOPINO: There was hearings to adopt the draft of the rule that was eventually submitted to the JLCAR Committee for approval. I believe that there is a transcript of those proceedings. How in depth it gets into this issue, I don't think it gets very much in depth to it at all. And that's just from my recollection of being at the hearing. But there is a transcript, and it's probably on our web site. I have not

1 looked at it recently. MS. DUPREY: Oh, the transcript is 2 on our web site? 3 MR. IACOPINO: I think it may be. 4 I have to double-check. But it's the 5 rulemaking from, I think it was approximately 6 7 2016 or 2017. 8 CHAIRWOMAN MARTIN: Commissioner Scott had his hand up. I just want to check 9 in with him in case he was involved or has 10 additional information. 11 COMMISSIONER SCOTT: Well, only a 12 little bit to add. There was a work group 13 14 that was established, and I think the Office 15 of Energy and Planning, which is now OSI, had 16 a series of stakeholder meetings in --17 CHAIRWOMAN MARTIN: Just a minute, Commissioner. Ms. Robidas has a --18 19 [Court Reporter interrupts.] COMMISSIONER SCOTT: Office of 20 21 Strategic Initiative. So my understanding 22 is -- my recollection is that they had held a 23 series of work sessions that helped inform

our rulemaking. And I think Lisa Linowes was

24

part of that.

I will add that, you know, I was part of the rulemaking once at SEC, and I viewed this requirement to be merely an attempt to make sure that the intervals weren't so far apart, that spikes in sound, if you will, were missed in the analysis. So that was my understanding. But that's -- anyways, if that helps, that's the recollection I have.

MR. IACOPINO: And that docket was 2014-04. It is on the web site. There were a number of filings contained in that docket.

CHAIRWOMAN MARTIN: Ms. Duprey, any other questions on this? Any suggestions as to action -- (connectivity issue)

[Court Reporter interrupts.]

CHAIRWOMAN MARTIN: I said any suggestions as to action? As Attorney Iacopino said, we have no specific requirement here. But the Committee could do whatever it deems appropriate under the circumstances. Gather more information?

Attorney Iacopino, what are our

options?

1

16

17

18

19

20

21

22

23

24

2 MR. IACOPINO: Further information 3 from either -- (connectivity issue)

CHAIRWOMAN MARTIN: Could you just start over.

MR. IACOPINO: I'm sorry. could request further information from the developer. You could request -- you could have a further hearing and invite Ms. Linowes and anybody else who the Committee believes might have a view on how the rules should be interpreted, and to determine whether or not the Acentech report is acceptable. You could encourage the Applicant to -- I mean, if it's feasible to do, and as I understand, it's probably not -- but you could encourage the Applicant to put their report together in a different manner going forward. I think that the options for the Committee are undefined, and, you know, you can do whatever you think will help you understand these post-construction studies. Help you better understand them.

CHAIRWOMAN MARTIN: So if I'm

1 understanding it, Mr. Tocci, the data that was collected which was required by the rule 2 has not been reported. So it's available, 3 but it's not reported; is that right? 4 MR. TOCCI: The 125-millisecond 5 data is available but not reported. 6 7 CHAIRWOMAN MARTIN: And you said 8 that would be pages of data. How many pages? A thousand --9 10 MR. TOCCI: Well, there's 11 probably -- let's see. Each 125 milliseconds would be a line of data. And right now in 12 the Acentech report there is probably 30 13 lines of data. So at 125 milliseconds over 14 15 several days, it probably would be thousands 16 of pages. 17 Frankly, the way it's best reported is either statistically as it has been or to 18 19 report it graphically. 20 CHAIRWOMAN MARTIN: Any questions 21 from the Committee? What is the will of the 22 Committee related to this? 23 Ms. Duprey. 24 MS. DUPREY: I was wondering if

someone with Mr. Getz, I'm not sure if it's Mr. Tocci or the previous individual who testified -- or who answered questions can answer this question for me.

We had four noise complaints with respect to the wind towers. And one person, Erin Morrison, is saying that the noise is intolerable, that it kept her up all night. She describes what the noise is. Is that level of sound something that falls within the dBAs or the dBs that are allowed under the standard?

MR. TOCCI: This is Greg Tocci.

The standard permits 40 at night and 45
during the day. Forty at night could make a
wind turbine sound predominant, and
especially in the absence of wind through
foliage and so forth -- or the foliage not
being present. That would possibly be a
mechanism of annoyance.

MS. DUPREY: So 40 dB would allow for the something sound, a constant, uneven, whooshing and thumping sound?

MR. TOCCI: It may be audible.

1 MS. DUPREY: Well, I think there's 2 a difference, excuse me, between audible and what she's describing. 3 MR. TOCCI: Hmm-hmm. 4 5 MS. DUPREY: Are you saying that that could be what she -- that that would 6 7 still fall within the standard? MR. TOCCI: She may be describing 8 it correctly, and it may still fall within 9 the standard. 10 11 MS. DUPREY: I'm just looking through the report quickly. My recollection 12 is that there was a -- and it was in the 13 14 Acentech, I think, report that talked about different levels of sound for different 15 16 activities. I'm having a hard time getting 17 to that exact page. Could the previous individual direct me to that particular 18 19 chart? 20 MR. IACOPINO: Page 7 of the 21 Acentech report. 22 MS. DUPREY: Okay. I got it. 23 MR. TOCCI: Yeah. 24 MS. DUPREY: I think I got two

Acentech reports, so let me see if I can get to Page 7. Of course it's the last page.

All right. Forty. So I'm looking at this chart. It goes from 110, rock band and jet flyover, to -- as a high at 110, to a low of 20, which is a broadcast and recording studio, which I would assume is very quiet.

We're at 40, which is just about a third of this level, which is quiet urban -- between library, quiet suburb nighttime, and quiet urban nighttime, small theater, large conference room background. This sound that she's describing sounds a lot louder than those things.

MR. TOCCI: The way you've described it, I would guess so, yes.

MS. DUPREY: Okay. I just want to be clear. I'm not describing anything. I'm reading the chart that was provided by Acentech, which I presume I got from somewhere. It's A-weighted decibel levels. Common outdoor and common indoor sound levels, that's what the one end of the spectrum to the other is in terms of

loudness. And I read directly from her letter her sounds, which you told me that those sounds would comport potentially with 40 dBs. But that's not anything like what this chart is showing.

1

2

20

21

22

23

24

MR. TOCCI: Understood.

MS. DUPREY: I quess, Madam Chair, that's what concerning me about this, that 40 dBs, according to the person who -- the Company that runs this facility, their chart is telling us that it's supposed to be pretty quiet at night, and yet the descriptions that we're getting from these folks is that it's way worse than that. So I just am not sure what we do with that. I'm not trying to subject the Applicant to some, you know, onerous standard that isn't required by the regulations, but at the same time, people ought to be able to live in their houses. And certain representations were made. And I assume that this chart was shown to folks when they were ruling on this back at the And I don't know what else to say. just -- the two pieces don't fit together for me.

CHAIRWOMAN MARTIN: I think we could -- we have, as Attorney Iacopino indicated, we have sort of almost any option. We could ask for the data to be given to us.

I assume, Attorney Iacopino, that would be okay.

We could hold a further public meeting and take public comments so that we get both sides of the -- so that those questions could be answered by the folks who are raising the concerns. We could open an investigation and make it more formal. I think that's up to the Committee to decide where they want to go with this.

Commissioner Scott.

COMMISSIONER SCOTT: Thanks. With respect to Member Duprey's questions, I would argue that that's almost a different process.

So we have, you mentioned, three complaints. And I understand the language used by the complainant. But there's a process by which we're supposed to validate complaints and have the Applicant do that.

1 And I see that as a little bit different than 2 the peer review that we're talking about Obviously they're both talking about here. 3 sounds, so I don't mean they're totally 4 different things. But I see it almost as 5 apples and oranges. I think we have a peer 6 review. You know, is that good enough or 7 8 not? As you mentioned, Ms. Duprey, you know, is the interval an issue or not? 9 I don't think it is, but that's a valid line of 10 11 inquiry. But my feeling is that the 12 complaints are a separate venue. difficult, I understand, for the people doing 13 14 the complaining because now you need to 15 mobilize something or somebody to come out 16 and actually do some monitoring with 17 equipment, and that makes it harder. see it as almost two different things. 18 just wanted to throw that out there, that 19 20 there is a venue for that. 21 CHAIRWOMAN MARTIN: Ms. Duprey.

Is Item 3 on our agenda what that

And that makes this clearer.

MS. DUPREY:

I really appreciate

22

23

that.

1 procedure is, Commissioner Scott? I just lost my 2 COMMISSIONER SCOTT: agenda. Well, it's certainly closer to that, 3 It's about validating the complaint yes. 4 5 measurement in the report, yeah. MS. DUPREY: So what is it that 6 7 we're supposed to do with this Item B? 8 might be misunderstanding what our purpose is Is it just to receive it, Madam 9 here. 10 Chairwoman? I think it's to 11 CHAIRWOMAN MARTIN: review it, discuss it, and see if the 12 13 Committee would like to take any other action related to it. 14 15 MS. DUPREY: On that report. 16 CHAIRWOMAN MARTIN: Yes. 17 MS. DUPREY: Okay. CHAIRWOMAN MARTIN: 18 Attorney 19 Iacopino. MR. IACOPINO: I was just going to 20 21 point out the same thing, in that it was 22 brought to the Committee's attention because 23 it's somewhat out of the norm, in that, because of the complaints that we received 24

about the Acentech report, we did engage Mr. Tocci, on behalf of the Committee, to peer-review that. We've not had a dispute over post-construction sound studies in the past. So just to give a little background as to why this was brought to your attention.

CHAIRWOMAN MARTIN: And I think the interval issue, if I'm recalling the history related to both post-construction monitoring and complaint monitoring, that interval has come up in both realms, although the rules are different. And the rule, the interval rule, is actually in the post-construction monitoring.

MR. IACOPINO: That's correct. The 125-millisecond rule pertains to the post-construction monitoring. There is a separate rule for validation of noise complaints that requires similar conditions to the time of the complaint and gives the Administrator of the Committee a little more leeway in how to conduct a validation study for a complaint.

CHAIRWOMAN MARTIN: Do any other

members of the Committee want to speak about
this or have thoughts about how to proceed?

Commissioner Scott. You're on
mute.

COMMISSIONER SCOTT: So on this particular item, you know, again, my view is we had a report. We had concerns raised about the report. We hired a -- or authorized the hiring of a specialist to do a peer review. I agree that there's this time interval question out there. But I think we've done our due diligence. The peer review has said that the original report was sound, so I'm comfortable with accepting that myself.

MR. YORK: This is Michael York.

If we have the data, does it not make sense for us to publish that data and give it to the person who was complaining about the interval?

CHAIRWOMAN MARTIN: Attorney

Iacopino, is there any reason we couldn't
require that to be done?

MR. IACOPINO: I'm going to defer

1	to Mr. Tocci for a moment, because I think
2	that data was provided to Ms. Linowes. I'm
3	not sure. But Mr. Tocci was involved with
4	Administrator Monroe at the time.
5	CHAIRWOMAN MARTIN: Mr. Tocci.
6	MR. TOCCI: This is Greg Tocci.
7	Would you like me to respond to that?
8	CHAIRWOMAN MARTIN: Yes, please.
9	MR. TOCCI: Yes, we have the data.
10	I'm not sure I did issue it to Ms. Linowes.
11	But we can do that if required to do so. And
12	it would be delivered as an Excel file, and
13	then she would be able to analyze it or have
14	her consultant analyze it.
15	CHAIRWOMAN MARTIN: I just want to
16	make sure I heard you at the beginning. You
17	said that had not been provided to them
18	prior?
19	MR. TOCCI: I'm not sure if it was
20	ever requested from us.
21	CHAIRWOMAN MARTIN: Okay. Is that
22	something the Committee would like to
23	require? Ms. Duprey oh, I'm sorry.
24	Mr. Wind, let's just find out

what's --

2 MR. WIND: Mr. Latour would like to respond to that.

CHAIRWOMAN MARTIN: Okay. Ms.

Duprey, would you like me to let him respond
and then go to you?

MS. DUPREY: No. I'd rather go first, only because he might be able to answer this question.

I understand from Mr. Tocci that this is very voluminous, and which would make sense. And I'm wondering if the data can be filtered, such that it shows us every point where it is above the standard for the times that they measured it. So we don't have to look at all the data, but we can see how often it happened and for how long and draw our own conclusion about that.

MR. TOCCI: That's not unreasonable. We would have to come up with an agreed way of filtering it. We'd be filtering to remove -- in the case of the measurements, which is in the next item, Item No. 3, during July of 2020, we -- most of the

noise that was prevalent was windblown foliage. That would not be true of the winter measurements done by Acentech. That data we do not have. That would have to be requested through TransAlta, or we'd go back to Acentech. The data that we have is for the evening of July 26th.

MS. DUPREY: Right. But it's available. The data is available.

MR. TOCCI: It is. Our data is available through TransAlta, yes.

CHAIRWOMAN MARTIN: Commissioner Sheehan.

COMMISSIONER SHEEHAN: So listening to this conversation -- I am by no means an expert when it comes to analyzing this data. But as I read the report, I believe that the post-construction sound monitoring was performed in accordance with our rules. The measurement was correct. And then you analyze all of those readings. As is outlined on Page 8 of the report, it says, since sound fluctuates from moment to moment, common practice is to condense the sound

level over a specific period of time into a single value. And that's what these other values are, the Leq, the L-10, the L-90. we're talking about reducing additional reports that maybe show just the exceedances of certain thresholds. But following the SEC standards, you are accounting for any fluctuations over specific periods of time. For example, if we're looking at the L-90, a one-hour measurement represents the quietest six minutes. And it's all stated in the report.

So I think having now asked Mr. Tocci to validate the approach used by Antrim Wind, you know, I am satisfied that their methodology is appropriate. Now we have to deal with Item 3 on our agenda -- or Item C on our agenda, the actual accusations of an exceedance at a particular time.

CHAIRWOMAN MARTIN: Mr. Latour had wanted to respond before, and I didn't get back to him.

Mr. Latour.

MR. LATOUR: Yes, thank you,

23

14

15

16

17

18

19

20

21

22

24

Chairwoman Martin. I just wanted to explain that a campaign as we've done in the winter and as we've reproduced in spring, summer and fall, according to the rules, we need to do attended and also unattended measurements.

And the unattended measurements, they last for several days, as you've seen in the winter report. So the total of data points that are taken at an eighth of a second, multiply 60 seconds per minute and so on, those are a lot of data points. They could not definitely, in a practical way, be delivered in the report.

Moreover, the analysis of the data needs to be done in conjunction with audio files, since we are listening to the sound that was happening at a certain time, to identify either if it was the environment, the environment and the turbines, or mainly the turbines. And we need to recall that the limit is applicable to the turbine sound only. So we need to distinguish any contribution from the environment or, quote, unquote, "the background sound."

This is an exercise. And I think, as Mr. Tocci has mentioned it in his peer review, it is necessarily complex. I believe that the report is somewhat clear, and it could always be clearer on how this process was undertaken. The measurement we're taking, as required per rules, and taken using similarly to a camera shutter setting to the proper value, which is an eighth of a second, but this data is aggregated and compiled in such way that you can make trends using statistical level, as the previous member mentioned, using the L-10s and the L-90s that represent the quietest or the highest levels for a specific period. these values are the ones that we're using to do compliance assessment. This is a trend that is in the industry, and it's also recognized in the ANSI referred to in your rules.

15

16

17

18

19

20

21

22

23

24

So I wanted to provide this clarification, because if we receive a request to provide all the raw data, it will be completely impractical at this point. I

1	will just shed some light on your reflections
2	on this subject.
3	CHAIRWOMAN MARTIN: I assume,
4	though, Mr. Latour, that the raw data was
5	provided to Mr. Tocci.
6	MR. LATOUR: No, this is incorrect.
7	CHAIRWOMAN MARTIN: Okay. So
8	MR. LATOUR: The report was
9	provided, and his review is based on the
10	content of the report.
11	CHAIRWOMAN MARTIN: Okay. So he
12	didn't review any of the data, just the
13	report and compliance with the rule.
14	MR. LATOUR: Which report contains
15	the data in appendix, but not an eighth of a
16	second, because that would be impractical, as
17	we said.
18	CHAIRWOMAN MARTIN: Okay. Ms.
19	Duprey.
20	MS. DUPREY: I appreciate
21	Commissioner Sheehan's reminding me that the
22	levels talk about the six quietest minutes
23	and the six loudest minutes. I'd forgotten
24	that part of the standard. So that's helpful

for me to understand. And I agree with her analysis of the report being prepared in accordance with the regulations. So I think I'm okay with the report itself at this point.

I'm just struggling with the disconnect between the standard being 40, which is supposed to be pretty quiet, and the reports of sound that we're getting in the complaints. And I'm not sure what I want to do about that. But at least for Item B, I'm okay.

CHAIRWOMAN MARTIN: Commissioner Scott.

COMMISSIONER SCOTT: I was just going to ask for clarification. Is presenting the data, if it was requested, is it impractical just to present it, or is it impractical to analyze it in any meaningful way? I just want to get clarification from the Applicant.

MR. LATOUR: Well, this is Jeff
Latour. It will be impractical to show it
probably in the paper version of a report, or

even Excel file, because as we've mentioned in the previous letter, dated July 17, the quantity of those data points, it's in the vicinity of 60 million data points. So even in the Excel file, where you're limited to about a million-something rows, it's mainly impractical as we saw. But the analysis, as I mentioned, is done in conjunction by listening to audio files that are gigs of data as well. So it's quite a large amount of data points and information that has been analyzed by Acentech.

CHAIRWOMAN MARTIN: How does the Committee want to proceed? From my perspective, I hear what Mr. Latour is saying about the need to analyze in conjunction with the audio, which is very complex. I think if it were just me, I would probably want to hear from the other side, to get a better understanding of why the rule required that in the first place, and then decide whether to get the data and have it provided.

Commissioner Scott.

COMMISSIONER SCOTT: If I could,

I'm wondering if -- right now we're not aware of anybody asking for the data. You know, we're conjecting that Ms. Linowes may want it. But our understanding is no -- we don't have any -- I'm not aware of anybody actually asking for that full amount of data.

So I guess what I would suggest is
I would like to move that we accept the
peer-reviewed study, to put the matter of did
this report meet our rules or not to bed, and
then leave for another day -- if we do get a
request for that information, then requiring
it to be produced would be another question
for another day.

CHAIRWOMAN MARTIN: Before we move off, I just want to make sure we're on the same page on that. And unfortunately, we don't have Administrator Monroe, because I know she could answer that for sure. My recollection was that there was a request that that information be provided. But Attorney Iacopino may know for sure.

You're on mute.

MR. IACOPINO: I am checking. I

was not involved at the beginning when there was a flurry of communication between the Administrator and Ms. Linowes. Hold on one second, see what I can find.

(Pause.)

CHAIRWOMAN MARTIN: Go ahead,
Commissioner.

COMMISSIONER SCOTT: I was just adding, while Attorney Iacopino was taking time to look things up, what I think we are sure of is that the Committee has not been asked about this question, I believe.

CHAIRWOMAN MARTIN: I think that's what Attorney Iacopino's looking at. I can't say for sure. I know that there was some communication. I don't think the Committee would actually house this information. But I'm not sure if it was to -- who it was to and who it was from.

MR. IACOPINO: I can't find a specific request for the data right now. However, I can report that Ms. Linowes has asked the Committee to schedule a technical session to discuss the report.

1 CHAIRWOMAN MARTIN: Attorney Iacopino, is a technical session --2 (connectivity issue) 3 CHAIRWOMAN MARTIN: Is a technical 4 session something that the Site Evaluation 5 Committee has used in a non-adjudicative 6 7 setting? 8 MR. IACOPINO: No, we've never had occasion to hold technical sessions, other 9 10 than in an adjudicative hearing generally on 11 an application. We have had work sessions, but with respect to the promulgation of our 12 rules, where we've broken various aspects of 13 the rules down into committees to formulate 14 15 proposed rules, which were eventually 16 approved. But in terms of a technical session to review technical details of a 17 particular project that was not in the 18 context of an adjudicative proceeding, we 19 have not had occasion to do that. 20 21 CHAIRWOMAN MARTIN: Ms. Duprey, you 22 had your hand up before. 23 MS. DUPREY: I did. I'm just

reading this letter from Lisa Linowes, dated

24

February 25, 2020, to Ms. Monroe. And on Page 2, under Measurements, she says -- and I don't know if she's quoting from a rule or what -- she says, For the purposes of transparency and repeatability, some logs and audio wave form data will be made available to the parties as requested. The rules call for the supervisory control and data acquisitions, SCADA system data, including hub height, wind speed and turbine power output to be reported for the purposes of validating operating conditions and whether the turbines are operating at full power. She seems to be indicating that she

ought to be able to get this information.

And in that same paragraph, she's talking about the .125 standard.

CHAIRWOMAN MARTIN: Attorney Iacopino.

MR. IACOPINO: I would just point out, I believe that letter was in the context of Ms. Monroe presented a protocol for -CHAIRWOMAN MARTIN: Ms. Duprey,

24 could you mute.

MR. IACOPINO: Ms. Monroe presented a protocol for the validation of the noise complaints. I believe that that is what was the discussion point during that period of time. I don't believe that there ever became an agreement on the exact protocol to be used. But we did have Mr. Tocci go out to Location 4 and take measurements. That occurred in July of this year. And that was in response to the complaint from Ms. Berwick, who lives at Location 4.

CHAIRWOMAN MARTIN: My recollection is that the protocol was adjusted to clearly state that, for that protocol which is in the complaint scenario, it would be taken at the .125 interval. But the same conundrum exists there, in that it's taken in that interval but not used in that interval.

MR. IACOPINO: It is not reported in that interval. That's correct.

CHAIRWOMAN MARTIN: Would any of the other folks on the line like to respond? Attorney Getz? Mr. Latour?

MR. WIND: Both have indicated to

me that they have that information. So you can decide which order to go in.

MR. LATOUR: This is Jeff Latour.

Is it possible to repeat the question?

Sorry. I'm not sure I quite understood what you asked.

CHAIRWOMAN MARTIN: I'm not sure we have a standing question at the moment.

We're discussing the issue of interval requirements and whether -- oh, perhaps the question that's on the table is whether Ms.

Linowes had asked the Committee for the data collected at the .125 interval.

MR. LATOUR: To my knowledge, Ms.

Linowes filed a letter dated May 21, where
she requested the data to be provided in
electric format. And we have replied to this
letter, on July 17, with Section 3,

Independent Assessment of Winter 2020 Sound
Report. We provide an explanation why we
believe it is impractical to provide the raw
data. And it's mainly the reason why I just
provided minutes ago, about the quantity of
data points, the cross-check that needs to be

done with the audio file and so on.

CHAIRWOMAN MARTIN: Okay. Thank

you.

Commissioner Scott, Ms. Duprey,

does that answer your question?

have a more manageable volume.

MS. DUPREY: Yes. She wanted the data, and she couldn't get it because it's impractical, as I understand it, given the volume. I'm still not sure why it couldn't be filtered in the way that I suggested and

CHAIRWOMAN MARTIN: Would you like Mr. Latour to respond to that?

MS. DUPREY: Sure. That would be great. Thank you.

MR. LATOUR: The data that is -- so providing a more filtering data, just looking at the portion, let's say for what I believe is suggested here, is to look at the values that are above a certain threshold, you still need to go through all the audio files, at least at the specific time, to identify if the samples -- imagine, an eighth of a second sample is a very short duration. And you'll

need to make a determination if it's the environment that contributed to these levels, or the environment and the facility, which is I'll say most probably often the case, or just the facility, which is most often never the case; it's more or less often a combination of the two.

So filtering the data as it is suggested is somewhat challenging because you need to always go back and re-listen to those samples. So I would, in my humble opinion, believe it's still somewhat impractical.

CHAIRWOMAN MARTIN: Commissioner Scott.

COMMISSIONER SCOTT: Thanks. Just to elaborate on that, to me, maybe here is the disconnect. To me, there's a difference between the raw data, which I don't understand why that can't be provided. I understand it may be a lot of data, and data that's been filtered. That I think I understand what you're saying. But I don't follow -- and maybe it wouldn't be of any particular use to her, but that's her

1 decision. I think the raw data should be made available. I don't understand why that 2 can't be made available. 3 CHAIRWOMAN MARTIN: Commissioner, 4 5 did you want a response to that from Mr. Latour? 6 7 COMMISSIONER SCOTT: That was my 8 hope, yes. CHAIRWOMAN MARTIN: 9 Okay. Mr. Latour, could you please respond to that. 10 11 MR. LATOUR: I'm not sure, sorry, that I do understand what's your question, 12 Commissioner Scott. 13 14 COMMISSIONER SCOTT: I'm trying to 15 understand your statement that it can't be --16 it's not practical to provide the data. 17 what I'm suggesting is the raw data. have a data set that was collected at these 18 19 intervals. It may be a large data set. Is it -- what is the technical issue with 20 providing that raw data should she ask for 21 22 that? 23 MR. LATOUR: Well, in the report, 24 if we were to show those data in a table, the table will make thousands of pages. If those are shown on graph, again, probably hundreds, if not thousands, of pages of graph. So depends on the format. Those data are crunched using proprietary softwares, depending on the sound interval meter that is used. So that's more probably the reason I would state why I still believe it is impractical to share and provide this data for a complete, independent, impartial review. Impartial review. Sorry.

COMMISSIONER SCOTT: Right. But if
I could elaborate --

CHAIRWOMAN MARTIN: Do you think -- go ahead. I'm sorry.

COMMISSIONER SCOTT: I don't think it's for the Applicant to wonder or put themselves in the requester's position. I think what I'm suggesting is if you have a data set, which you clearly do, and it may not be of great use to anybody because it's so large, and I don't know what the format of it is, that's what I'm suggesting would be made available. And I wouldn't want to make

that available unless it was asked for. But I'm not following why that raw data wouldn't be available, understanding from your perspective it may be inappropriate to use it in a certain way. That's a different question than whether the raw data would be made available. That's what I'm trying to understand.

MR. LATOUR: I understand your point. And if we are ordered to provide such data, I think one of the first step will be to agree on which format it will be produced. As I said, we're talking about millions of data point. Those will need to be interpreted with the right context and how they gather all -- how they also align with the audio files, which are also several gigs So it's probably not impossible. of data. And we never pretended it's impossible. always and we're still believing that it's impractical. I hope that answers your question.

COMMISSIONER SCOTT: Thank you.

CHAIRWOMAN MARTIN: Commissioner

Sheehan. Oh, I apologize. Looks like Commissioner Scott's done.

Commissioner Sheehan.

acknowledge that Ms. Linowes previously requested the data, in her letter to Administrator Monroe on September 23rd, she doesn't request the data. She's challenging how the data was analyzed. So I don't know that there is necessarily value in providing the raw data if it's not practical to analyze it in the same way as the consultant performing the analysis did. And even Mr. Tocci didn't do analysis of the data itself. He was validating methodology.

But in her letter, Ms. Linowes does specifically call out some discrepancy she believes between how the data was analyzed and how it should have been evaluated if you were to follow the ANSI guidelines. This is the area where I would like to focus our attention, is understanding she makes some comments that some of the standards are misapplied and misinterpreted. So I really

1	want to understand more about those
2	particular allegations so that we could make
3	sure I mean, that was part of the reason
4	that we wanted to have the independent
5	analysis done. But when it comes to the
6	actual noise exceedances and the complaints
7	that we have received, I would like to
8	understand what data is available and how
9	we're evaluating it, to know whether or not
10	it corroborates with what the abutters have
11	been actually experiencing in terms of
12	individual occurrences.
13	CHAIRWOMAN MARTIN: I understand
14	Attorney Getz also wanted to speak. Are you
15	there, Attorney Getz?
16	Mr. Wind, is he still with us?
17	MR. WIND: He appears to be, and
18	he's not muted at the moment.
19	MR. GETZ: Madam Chair?
20	CHAIRWOMAN MARTIN: Yes.
21	MR. GETZ: Well, it's been a little
22	bit of a moving target. I had first
23	indicated to speak because basically from
24	what Mr. Latour pointed out is that there was

a request about the data. So I'll move on from that.

20

21

22

23

24

But seems to me that there's three separate issues here: What's the status of the peer review, what's the status of the sound valuation reports, and what to do about this other issue of the raw data?

With respect to the peer review, I think it's pretty clear that Mr. Tocci finds that the report is consistent with the rules and the ANSI standards. There is this underlying issue, dispute about the eighth-of-a-second measurements versus how the reports should be compiled. And I think Mr. Iacopino covered that. And, you know, there has been claims made by Ms. Linowes that Antrim has replied to both on its own and through the Acentech reports and by the letter in August from Mr. Needleman. Antrim Wind believes that the measurements and the reporting do not need to be any different than they have been and that the rule is satisfied. So we would hope that you would accept this report and the peer review.

1 There is a separate issue which hasn't been addressed yet about the complaint 2 validation. But Antrim Wind also supports 3 Mr. Tocci's conclusions about the specific 4 complaint validations. 5 And as for the data, of course, Mr. 6 7 Latour has already indicated that they're prepared to provide it, that volume of data, 8 in some form that would probably have to be 9 10 worked out. 11 CHAIRWOMAN MARTIN: Okay. Thank 12 you, Attorney Getz. 13 Any further discussion from the 14 Committee? Does anyone want to make a motion? Commissioner Scott. 15 16 COMMISSIONER SCOTT: Okay. I tried 17 to do it before. I didn't do it very well. So I'd like to make a motion that 18 19 we accept the Tocci report, the peer review 20 of the Acentech report, and we accept it. 21 CHAIRWOMAN MARTIN: Is that the 22 whole motion? 23 COMMISSIONER SCOTT: I think Yes. that's all we need. 24

1	CHAIRWOMAN MARTIN: Ms. Duprey, did
2	you hear the motion?
3	MS. DUPREY: That we accept the
4	report.
5	CHAIRWOMAN MARTIN: Yes. Okay. I
6	just wanted to make sure. I know you were
7	moving.
8	MS. DUPREY: Yes, I'm starting
9	packing in a minute. I'm flying out in an
LO	hour and a half.
L1	CHAIRWOMAN MARTIN: And I'll note
L2	we don't have a second yet. Mr. Kassas has
L3	his hand up. Mr. Kassas.
L4	MR. KASSAS: I would second the
L5	motion if we could just add to it, "accept
L6	the report and publish it and make it
L7	available to all parties involved."
L8	CHAIRWOMAN MARTIN: The report or
L9	the data? The report is already available.
20	MR. KASSAS: Well, it has a section
21	of the data in it; right?
22	CHAIRWOMAN MARTIN: It doesn't have
23	the raw data that we're talking about, just
24	the analysis.

1	MR. KASSAS: No. It has the
2	tabulated data. That's the one I'm referring
3	to.
4	CHAIRWOMAN MARTIN: Okay. I
5	believe the report is already public
6	MR. KASSAS: Okay.
7	CHAIRWOMAN MARTIN: on our web
8	page?
9	MR. KASSAS: Then I second
10	Commissioner Scott's motion.
11	CHAIRWOMAN MARTIN: Okay. Any
12	discussion?
13	CHAIRWOMAN MARTIN: I think the
14	only piece I would add to this discussion
15	would be, as Attorney Getz described it, and
16	I think it was a good way to describe it,
17	there are three issues, the third of which is
18	the raw data question. I probably would add
19	to this motion "to require the production of
20	the raw data as requested."
21	Any other discussion?
22	[No verbal response]
23	MS. DUPREY: I agree with you.
24	CHAIRWOMAN MARTIN: Okay.

1	MR. KASSAS: Do we intend by "raw
2	data" I understand what we discussed about
3	it. But is it in the format of really raw
4	data or in the format of a trend or an
5	analytical meaning?
6	CHAIRWOMAN MARTIN: When I spoke of
7	it, I'm just referencing the raw data with no
8	analysis, no monitoring report, just the raw
9	data
10	MR. KASSAS: Okay.
11	CHAIRWOMAN MARTIN: presumably
12	provided electronically.
13	MS. DUPREY: So is that part of the
14	motion or no?
15	CHAIRWOMAN MARTIN: It is not part
16	of the motion at the moment, unless someone
17	would like to modify the motion.
18	MS. DUPREY: I would modify the
19	motion to include the raw data.
20	CHAIRWOMAN MARTIN: It would have
21	to be Commissioner Scott.
22	MS. DUPREY: Sorry.
23	COMMISSIONER SCOTT: I prefer not
24	to, but I guess I could handle that as a

friendly amendment. I would want to add, if we're going to do that, "upon request." But what I don't want to incur is the Applicant having to now massage things. When I talk about "raw data," and it sounds like it would be of little value even if it was requested, is the format that it's in. That's analogous to the people in state government, I think, that if we get an information request, we're not required to create something. We're just required to give what we have, if you will. So I wouldn't want the Applicant feeling that, you know, to be -- I would prefer it to be a separate requirement. But I could live with that as a friendly amendment I suppose.

CHAIRWOMAN MARTIN: Ms. Duprey.

MS. DUPREY: Just in response to Commissioner Scott. I thought that either Mr. Tocci or Mr. Latour perhaps said that the data actually had been requested.

COMMISSIONER SCOTT: That was unclear to me. I thought it was the analysis that was in question, not the raw data. But I'll let them answer that.

1 MR. TOCCI: I don't recall having 2 received a request for data. And the only data I have would be for our four-hour or 3 five-hour measurement on July 26th. 4 CHAIRWOMAN MARTIN: I think what I 5 heard may have been Mr. Latour, that there 6 7 was a letter dated May 21 requesting the data to be provided in electronic format. 8 MS. DUPREY: Right. 9 10 MR. LATOUR: This is correct. 11 CHAIRWOMAN MARTIN: Commissioner Sheehan. 12 13 COMMISSIONER SHEEHAN: I just 14 wanted to clarify that was a letter to Antrim 15 Wind. That wasn't a request of the SEC, 16 correct, unlike the subsequent letter in 17 September that was directed to the SEC discussed the analysis? As long as --18 19 [Court Reporter interrupts. Multiple parties 20 speaking.] 21 COMMISSIONER SHEEHAN: I just want 22 to make sure I understand whether the data 23 was requested of this body or of Antrim Wind, so that, you know, you're giving responses to 24

1 a request versus an independent request that went directly to Antrim Wind. 2 MR. GETZ: Madam Chair. 3 CHAIRWOMAN MARTIN: Is that 4 5 Attorney Getz? MR. GETZ: Yes, Madam Chair. 6 7 CHAIRWOMAN MARTIN: Yes. Go ahead. MR. GETZ: So the May 21 letter was 8 addressed by Ms. Linowes to Pam Monroe. 9 10 that's at the bottom of Page 2 that talks 11 about the raw data. But to the extent you go ahead on 12 the raw data issue, if Mr. Latour could speak 13 14 to that, because I think it's going to be one 15 of those issues about how would you actually 16 transmit it, what form, or leave it to Mr. 17 Iacopino or somebody else to mediate how that data might be transmitted. 18 Because I think that could be a significant logistical issue. 19 20 But Mr. Latour may want to address that 21 further. 22 CHAIRWOMAN MARTIN: Okay. Thank 23 you. 24 Mr. Latour.

1 MR. LATOUR: As you can recognize, 2 those measurement are made by instruments that have proprietary format. And therefore, 3 analysis of, in this case, RION-manufactured 4 5 sound level meters, a third-party would need to have proprietary software to analyze those 6 7 So as I mention before, these data are 8 crunch and aggregated, and then statistical 9 analysis and averaging are done. As I 10 mention before, this is very unusual, to say 11 the least. And that's why a conversation on what the format is expected from us will need 12 to, I believe, happen before we can even 13 start such exercise that is technically not 14 15 requested by the rules and inside a report 16 such as this one. 17 CHAIRWOMAN MARTIN: Okay. Thank 18 you. Any further discussion? 19 20 Commissioner Scott, did you actually amend your motion? Or where are we with your 21

COMMISSIONER SCOTT:

really rather address this as if we get a

Yeah, I'd

22

23

24

motion?

request. There's enough complications with
it. I would rather keep my motion where it
is.
CHAIRWOMAN MARTIN: Okay. So we
have a motion and a second and we've had
discussion. So why don't we take a roll call
vote on that motion.
Commissioner Scott.
COMMISSIONER SCOTT: Yes.
CHAIRWOMAN MARTIN: Commissioner
Sheehan.
COMMISSIONER SHEEHAN: Yes.
CHAIRWOMAN MARTIN: Mr. York.
MR. YORK: Yes.
CHAIRWOMAN MARTIN: Mr. Arvelo.
MR. ARVELO: Yes.
CHAIRWOMAN MARTIN: Ms. Duprey.
MS. DUPREY: Yes.
CHAIRWOMAN MARTIN: Mr. Kassas.
MR. KASSAS: Yes.
CHAIRWOMAN MARTIN: And the Chair
votes yes. Motion carries.
Okay. I want to note the time. We
have now exceeded the hard stop by nearly a

1 half-hour. Are people available to continue on to Item C at this point? We do need 2 everyone in order to continue. 3 MS. DUPREY: I have to catch a 4 plane tonight. I have a car picking me up in 5 an hour and I don't have a packed suitcase. 6 7 CHAIRWOMAN MARTIN: Okay. So that sounds like a no. 8 Mr. Arvelo. 9 MR. ARVELO: Yes, I -- if we were 10 11 to continue, I would need 10-, 15-minute break because I'm having back issues, so... 12 CHAIRWOMAN MARTIN: Fair enough. 13 14 But without Ms. Duprey, we would not have a quorum to continue. And I do want to be 15 16 sensitive to people's schedules and try to stick to the amount of time that we allotted 17 with this. So I think that we will have to 18 19 take up Item C and perhaps the issue related 20 to the raw data at another meeting. 21 Attorney Iacopino, anything else 22 that we really need to address before we 23 conclude?

24

MR. IACOPINO: I can't think of

1	anything you need to address. I will write
2	up an order memorializing the motions and
3	votes taken here today.
4	CHAIRWOMAN MARTIN: Okay. Thank
5	you.
6	And other than that, anything from
7	the Committee?
8	[No verbal response]
9	CHAIRWOMAN MARTIN: Thank you. We
10	are adjourned. I appreciate all your time
11	very much.
12	(Whereupon the meeting was adjourned at 5:00
13	p.m.)

1 CERTIFICATE

I, Susan J. Robidas, a Licensed
Shorthand Court Reporter and Notary Public
of the State of New Hampshire, do hereby
certify that the foregoing is a true and
accurate transcript of my stenographic
notes of these proceedings taken at the
place and on the date hereinbefore set
forth, to the best of my skill and ability
under the conditions present at the time.

I further certify that I am neither attorney or counsel for, nor related to or employed by any of the parties to the action; and further, that I am not a relative or employee of any attorney or counsel employed in this case, nor am I financially interested in this action.

(ORIGINAL CERTIFICATION FILED WITH PUBLIC UTILITIES COMMISSION)
